DETAILED ACTION

Page 2

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2000-16392 in view of Bochan (3,118,468). JP '392 teaches a propulsion system, comprising: a vehicle producing exhaust; a conduit connected to said vehicle, the exhaust flowing through said conduit; and an exhaust altering attachment 2 or 17 (depending on which embodiment) disposed on said conduit, the attachment having a deformable slit (either 4 or 18) having inwardly and outwardly opposing portions defined therein. The slit functions as a check valve in that it prevents the reverse flow of the water. JP '392 does not teach the slit has a generally elongated S-shaped slit. Bochan teaches a resilient S-shaped check valve having inwardly and outwardly opposing portions where the Sshape having inwardly and outwardly opposing portions is demonstrated as being superior to the conventional straight slit (col. 1, lines 15+) - compare with Fig. 2 of JP '392 and also being superior to the multiple straight slit configuration (col. 1, lines 28+) – compare with Fig. 7 of JP '392. The advantage of the S-shape includes reducing the stress. It would have been obvious to one of ordinary skill in the art to make the exit

attachment of JP '392 with an S-shape, as being superior to the straight slit or multiple slit or to reduce stress. The use of the S-shape for the exhaust will inherently result in the three dimensional helical pattern as the structure is analogous to that disclosed.

Response to Arguments

- 3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
- 4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Contact Information

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Ted Kim whose telephone number is 571-272-4829. The

Application/Control Number: 10/677,800

Art Unit: 3746

Examiner can be reached on regular business hours before 5:00 pm, Monday to Thursday and every other Friday.

The fax numbers for the organization where this application is assigned are 571-273-8300 for Regular faxes and 571-273-8300 for After Final faxes.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Thorpe, can be reached at 571-272-4444.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist of Technology Center 3700, whose telephone number is 703-308-0861. General inquiries can also be directed to the Patents Assistance Center whose telephone number is 800-786-9199. Furthermore, a variety of online resources are available at http://www.uspto.gov/main/patents.htm
